

PREMIUM NORTH AMERICAN MANUFACTURER SPECIALIZING IN GEARBOXES

Providing Reliable, Seamless Drop-in Replacements with Short Lead Times

SE ENCORE (SE)

The SE Encore series of worm gear speed reducers supports a wide variety of industrial applications with incomparable gearing performance. SE provides design engineers with a wide array of shafting and mounting options, motor connection options and gear configurations.

- WinGuard™ Epoxy Coating System
- Suitable for high-pressure washdown and outdoor applications
- H1 food-grade Mobil Glygoyle 460 synthetic lubricant
- More than 6 million configurations

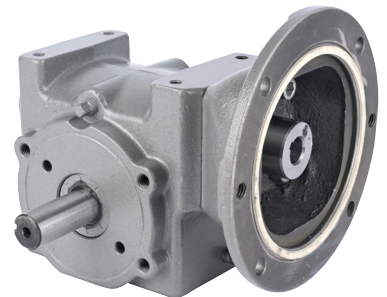

LEAD TIME: 5 DAYS

RD SERIES (RD)

RD Speed Reducers eliminate fretting corrosion and deliver unparalleled performance. These worm gears are dimensionally interchangeable with most right-angle speed reducers.

- Gearing designed for up to 97% efficiency
- Universal Lubricant Level
- WinGuard™ 316 Stainless Epoxy Coating
- Modular Design

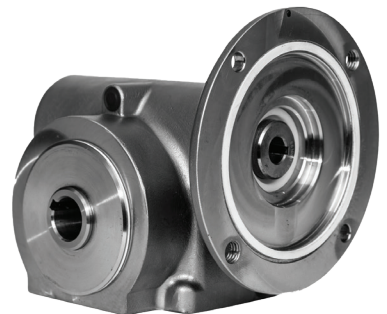

LEAD TIME: 5 DAYS

STAINLESS CONVEYOR DRIVE (SCD)*

IP69K-rated stainless steel drive solutions with seamless housings minimizes bacteria and ensures reliable performance in food and beverage applications.

- Seamless housing with no covers, seams, or bolts
- IP69K-certified for severe washdown
- Premium-efficiency gearing
- FDA-compliant blue plugs; magnetically and X-ray detectable, pressure-wash tested to 1450 psi

**Stainless gearmotors available upon request*

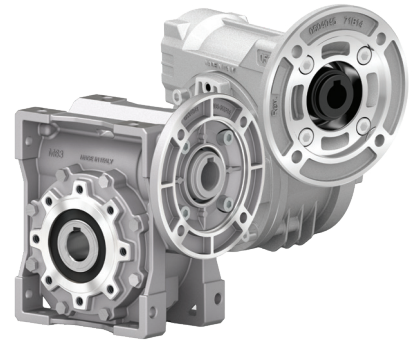

LEAD TIME: 5 DAYS

ALUMINUM SPEED REDUCERS (ALRN/ALSQ)

Compact right angle worm gear reducers with a single piece aluminum housing are dimensionally interchangeable with many global manufacturers for easy replacement and flexible integration.

- Modular design allows for precise assembly and quick delivery
- Dimensionally interchangeable with minimal cost and effort to change from a competitive manufacturer
- Aluminum housing provides corrosion resistance and eliminates risk of paint chips breaking off

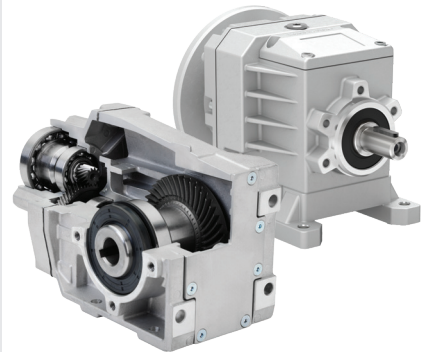

LEAD TIME: 3 DAYS

HELICAL GEAR PRODUCTS (HXB/HXI)

Compact, high performance helical gear solutions with modular designs provide installation friendly mounting options for demanding applications.

- High-efficiency helical gearing for smooth, quiet operation
- Compact, modular designs for flexible mounting options
- Engineered for reliable performance in demanding applications
- Broad range of ratios, sizes, and configurations available

LEAD TIME: 3 DAYS

VISIT THE WINSMITH WEBSITE TO USE OUR PRODUCT CONFIGURATOR

Winsmith produces custom, reliable, high-quality solutions with millions of product configurations all manufactured at three US facilities.
